

**Release Notes** [March 13, 2013]

1. Added new STAR data through February 2013.

**Release Notes** [February 15, 2013]

1. Added new STAR data through January 2013.

**Release Notes** [January 30, 2013]

1. Historical FPR periods, prior to the station becoming a STAR station, now require all inspectors to have a .4 or better FPR.
2. STAR stations now correctly show a "Fail\*" (with an asterisk) for the first consecutive short term failure when the previous short term period was passing due to an appeal.
3. Inspectors now show "No Score" FPR scores on the Inspector page for FPR periods when they have not performed any tests during that period.

**Release Notes** [January 10, 2013]

1. Added new STAR data through December 2012.

**Release Notes** [January 2, 2013]

1. Stations accepted into the STAR program now appear as STAR stations on the STAR web page.

**Release Notes** [December 27, 2012]

1. New stations will now properly show a "No Data – Fail" for the "Current Evaluation Quarter" result, instead of their most recent result (e.g. October or November).
2. Newly licensed stations will now have inspectors properly appear in the FPR table.
3. New "Comment" column on the Station FPR table to be used when a station appeals an application denial or invalidation based on an inspector(s) in its analyzer(s) with ineligible FPR scores, or when a station has an inspector(s) in its analyzer(s) with ineligible FPR scores from a previous six month period.
4. An inspector that was removed from an analyzer then added again during the same six month period will now have each of those events appear in the FPR table.
5. FPR periods no longer start on January 1 and July 1 of each year. Instead, starting in January 2013, the FPR scores will be applicable as of the date the new FPR scores are published on the Web page (FPR periods prior to January 2013 will still start on January 1 and July 1).
6. Inspectors that have been removed from the station's analyzer(s) will now appear as greyed-out on the FPR table (however, note that these technicians can still cause a station to be failing the FPR requirement if the station is a STAR station).
7. Either the inspector's FPR score or the comment for the inspector, or both will appear in red to indicate that the inspector is causing the station to fail the FPR requirement.
8. Changed column headings on Station FPR table to "Entered Into EIS" and "Removed From EIS."
9. New Station Messages appear on the Station page explaining whether the station currently has STAR status and whether it is currently passing STAR requirements. Old message stating the STAR program would not go live until January 1, 2013 is removed.

10. Added STAR certification date above FPR table on Station page.
11. Created a new Inspector page with the same look and feel as the station page.

**Release Notes** [December 12, 2012]

1. Added new STAR data through November 2012.

**Release Notes** [December 7, 2012]

1. Updated STAR Q&As.

**Release Notes** [November 27, 2012]

1. Fixed an issue where inspectors did not display in the correct FPR period if they were added to the analyzer or removed from the analyzer during the last month of a six month period.

**Release Notes** [November 19, 2012]

1. Added new STAR data through October 2012.

**Release Notes** [November 2, 2012]

1. Updated STAR Application.

**Release Notes** [October 24, 2012]

1. Added the License Type ("Test Only" or "Test and Repair") to the Station Information box on the Station tab.
2. Excluded Repair Only stations from being queried from the STAR page.
3. Fixed an issue where the "Click here to verify Station License" link was not working for Test Only stations.
4. Fixed an issue where the Current Quarter STAR Results box on the Station tab was displaying results from a previous evaluation quarter instead of the current evaluation quarter for some stations that have not done any tests during recent months.

**Release Notes** [October 11, 2012]

1. Added new STAR data through September 2012.

**Release Notes** [September 19, 2012]

1. Added new STAR data through August 2012.

**Release Notes** [August 20, 2012]

1. Added missing test detail records from July 2012.

**Release Notes** [August 15, 2012]

1. Added new STAR data through July 2012.
2. Fixed an issue where some OBDII scores on the Inspector page were not displayed correctly.
3. FPR Scores on the Inspector page no longer rounds up to the nearest hundredth decimal.

4. Fixed an issue on the new Station page where FPR Scores were displaying as 'No Score' for July 2011.
5. Fixed an issue on the new Station page where FPR Scores for January 2012 were displaying the same scores as July 2012.
6. Fixed an issue on the new Station page where stations with 'No Score' FPR Scores for July 2012 were displaying the same scores as January 2012.
7. Fixed an issue where users of the STAR page would sometimes get a run-time error on the Inspector page when trying to view historical data.
8. Fixed an issue where some stations were not displaying any data on the FPR tab.
9. Added a footnote to the FPR Summary table on the Inspector page.

#### **Release Notes** [July 16, 2012]

1. Added new STAR data through June 2012.
2. Created a new STAR Station screen with a cleaner look and feel. The new screen has three tabs, one for general station information, one for short term information, and one for FPR information. A new page for inspectors will follow.
3. The 'Current Quarter STAR Results' box on the Station tab now shows the station's results for the most recently completed evaluation quarter. Displaying data from other months will no longer cause the Current Quarter STAR Results to change based on the most recent data being viewed.
4. Added a link for stations and inspectors that takes the user to BAR's "Verify a License" Web page.
5. Fixed an issue where inspectors with an end date in June would still appear in the station's FPR display for scores applicable as of July.
6. Stations with no inspectors now have an FPR Result of "Fail."
7. Stations with no Short Term data now have a Short Term Result of "Fail."
8. Fixed an issue where some stations were not displaying any FPR Result.
9. Fixed an issue where some stations that had not conducted recent tests were displaying an FPR Result of "No Score" instead of the station's actual FPR score.
10. Fixed an issue where some stations did not show any number in the "Total Test Deviations" column.
11. Fixed an issue where some stations and inspectors were given an incident for not performing an OBD II test on a CAN vehicle.
12. Filled in some missing station/inspector records for months where no tests were performed.
13. Updated some of the STAR Web page Terms to match the new language on the redesigned station page.
14. FPR Scores on the Station page no longer rounds up to the nearest hundredth decimal.

#### **Release Notes** [April 20, 2012]

1. Added new STAR data through March 2012.

2. Fixed an issue where some stations were not displaying a double asterisk (\*\*) on the Similar Vehicle Failure Rate even though the Station Average was below the standard and the station's SVFR Result was reading 'OK.'
3. Fixed an issue where inspectors with an FPR score would display in red on a Station's Follow-up Pass Rate table even though the Inspector had an 'End Date' (i.e., inspector had been removed from the station's analyzer).
4. Added a 'Standard' column to the Short Term display for stations and inspectors. The Standard column will display a number that is 125% of the 'State Average' for that performance measure, except for the Similar Vehicle Failure Rate, which will display a number that is 75% of the State Average in the Standard column.
5. Fixed an issue where the July 2011 FPR results for some stations were based off the station's January 2012 FPR score instead of the station's July 2011 FPR score.
6. Fixed an issue where inspection "incidents" occurring within a given month sometimes changed slightly from one reporting period to the next due to sample size variations between the reporting periods.

#### **Release Notes** [January 26, 2012]

1. Updated the STAR Web site terms (formerly "definitions") and Q&As.

#### **Release Notes** [January 25, 2012]

1. Added new STAR data through December 2011.
2. Changed the heading for FPR. The page now reads "Scores applicable as of [date]." As a result, the FPR range for the first STAR report no longer displays "July 2011 – December 2011." The first report for the FPR now correctly reads, "Scores applicable as of July 2011."
3. Fixed an issue where some stations/inspectors who had not performed any inspections for an extended period of time were incorrectly displaying a "No Score." As a result of this change, some stations/inspectors may see their July 2011 FPR score change from "No Score" to a numeric score.
4. Fixed an issue where some stations were not displaying an overall FPR "Pass" or "Fail" result in the "Current STAR Results" field.
5. Fixed an issue where some inspectors were not appearing in the FPR box for stations.
6. Fixed an issue where OBD results were sometimes incorrectly displayed as a Deviation. This change will only affect OBD results as of the three-month period ending December 2011 and any new data added thereafter.

#### **Release Notes** [January 6, 2012]

1. Fixed an issue where the STAR Web page briefly displayed incorrect date range (January 2012 – June 2012) for FPR scores that had not yet been released.

#### **Release Notes** [December 29, 2011]

1. Fixed an issue where some stations were showing a "Fail" for the "Incorrect Gear Selection" measure even though they were passing the standard.

2. Fixed an issue where a “technical issues” message appeared on some inspector pages.

**Release Notes** [December 28, 2011]

1. Initial release of STAR Web page and performance results.
